ABOUT

CS student with hands-on experience building **ML pipelines**, **computer vision** systems, and **LLM-powered** applications. Proficient in PyTorch, Python, and applied deep learning — with projects spanning multimodal classification, **RAG-based chatbots**, and **CNNs**, currently deepening expertise in LLM fine-tuning, agent architecture, and production AI deployment, seeking an AI Engineer internship to apply and grow this foundation on real-world systems.

PROJECTS

❖ RAG Chatbot - Agentic System

[GitHub](#)

Developed a document-based Q&A chatbot using **React.js + FastAPI + Pinecone**, enabling efficient retrieval and context-aware responses. Designed a **parsing, chunking, embedding**, and **vector retrieval** pipeline.

❖ Multimodal Genre Classification (BERT + ResNet-50)

Benchmarked multimodal approaches on the MM-IMDb dataset, combining **BERT** text embeddings and **ResNet-50** image features for multi-label genre classification.

❖ Interview Cheat Detection - Computer Vision

- ❖ Built a real-time proctoring tool using **MediaPipe**, **DeepFace**, and **OpenCV** to detect gaze deviation, **face spoofing**, and unauthorized objects.

SKILLS

- ❖ **AI/ML:** Prompt Engineering, ML, DL, RAG, Data Pipelines, and Vibe Coding, GenAI
- ❖ **Mathematics:** Linear Algebra, Probability & Statistics, Calculus
- ❖ **Programming:** Python, JavaScript, React.js, TypeScript, C++, DSA
- ❖ **Libraries:** Pytorch, Tensorflow, ScikitLearn, Numpy, and Pandas
- ❖ **Tools:** Git & GitHub, Cursor, OpenCode

EXPERIENCE

❖ Business Development Executive | Teknologics, LLC

(Jun 2023 to Feb 2024)

Performed data mining on Upwork job listings and automated client outreach, demonstrating analytical and communication skills.

EDUCATION

- ❖ Superior University, Lahore – Bachelor's in Computer Science *Expected Degree 2028*
